

Batch Number: 2018_CSE_08

Instructor's Name : Mrs. Ashwini

Smart Garbage Management System

21 February 2019

Session 3

Study about the architecture of IoT and executed some of the basic programs

This session we understood about the architecture of IoT and the stages of IoT and what the are the major application of the IoT on our modern life. We also tried some of the basic programs that includes LED blink, with total of 100 counts. And also designed a schematic circuit for the use of servo motor in our project.

In further classes we are going to code for the servo motor which is used in our project.
